

EXECUTIVE SUMMARY

This strategic plan was developed by a team of dedicated leaders and loyal supporters of the Murrysville Area Watershed Association (MAWA). The Strategic Planning Team consisted of the MAWA Executive Committee, staff, and consultants including:

Ben Sampson, President
Rob Bowman, Treasurer and Secretary
Jim Morrison, Executive Director
Jessica Mallisee, Property Manager
Tim Denicola, Project Manager, CEC
Kim Gridley, Facilitator, Earth Integration

The plan serves as a roadmap to guide MAWA towards their vision of resolving the legacy of coal mining impacts in Turtle Creek and consequently uplifting the environmental quality of Southwestern Pennsylvania.

The team showed tenacity and ambition in 2024 throughout the strategic planning process, concurrent with construction of their first major AMD Remediation project on Lyon's Run. The team gracefully faced challenges throughout this planning period and remained cohesive, maintaining forward momentum toward their goals.

Six priority areas of focus were identified within five strategic initiatives for this Strategic Planning period (2025-2030).

Priority Areas of Focus:

- HR/Development
- PR/Coordination
- Planning and Implementation
- Funding
- Maintenance
- Monitoring

Strategic Initiatives:

- Administration and Management
- AMD Remediation Projects
- Watershed Stewardship Program
- Legacy and Succession Planning
- Program Expansion

THE EMERGENCE OF MAWA

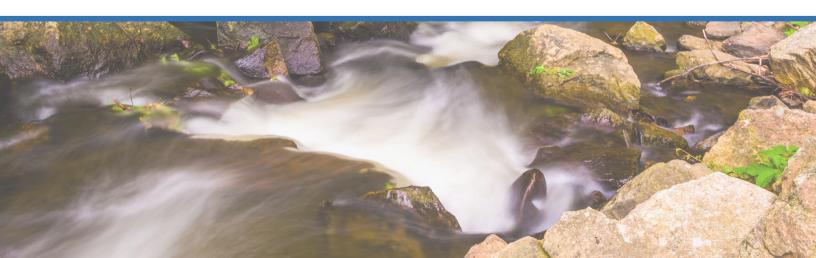

The Murrysville Area Watershed Association (MAWA) was founded in 2022 by the president of the Lyon's Run Watershed Association (LRWA), Ben Sampson. Mr. Sampson, a regional real-estate developer, identified a need for leadership in the remediation of Acid Mine Drainage (AMD) polluted waters in his community. Nearing retirement, Sampson, longed for a way to give back to the community that had supported his family and business throughout his career.

With the heart of a steward and philanthropic means to initiate his vision, Ben has developed a team of highly skilled and environmentally minded professionals and volunteers eager to restore the waters in the Murrysville area for wildlife habitat enhancement and community access and recreation.

This small team of committed individuals came together to conceptualize, design, and secure funds for implementation of the Lyon's Run passive AMD project. In 2024, vision became reality with the construction of this ground breaking project. As the project developed, the team became aware of additional opportunities for restoration and remediation projects, community engagement and education, and organizational capacity building outside of the Lyon's Run watershed. This expanded vision and ambition led to the creation of the Murrysville Area Watershed Association (MAWA) in 2022. MAWA has become the umbrella organization and administrative arm of the Lyon's Run Watershed Association.

In early 2024, the MAWA team engaged Earth Integration to facilitate a strategic planning process. This document is the culmination of that 10 month process. MAWA leaders did not wait for the plan's completion to take action. A few of MAWA's highlighted accomplishments of 2024 include:

- Construction of the Lyon's Run passive AMD remediation project.
- Design and Implementation of The Common's data management platform.
- Creation of a informational video describing the Lyon's Run project.

MISSION AND VISION

Mission:

MAWA promotes the enhancement of environmental quality throughout the watersheds of the Murrysville and Export areas of Southwest PA.

Vision:

We resolve the legacy of coal mining impacts in Turtle Creek leading to development of a template for successful AMD remediation projects beyond our waters.

We uplift the environmental quality of Southwestern Pennsylvania through our commitment to enhancing ecological function across the watersheds of our region.

A vision of MAWA in 2030:

- Completing the White Valley active AMD remediation project implementation.
- Supporting 4 staff (PT/FT): Executive Director (FT), Administrative Assistant (PT), Volunteer/Stewardship Coordinator (PT), Programs Manager (FT), Development Director/Grant Writer (PT).
- Sustained funding plan through 2035.
- Maintaining an active and successful Watershed Stewardship Program.
- Collaboration with Turtle Creek Watershed Association.
- Leading a consortium of regional watershed associations.
- Preceding reputation of high quality delivery and performance.
- Project pipeline prioritization in place.
- Expanded area of influence.
- Expanding beyond water quality: safety, historical preservation, greenway and greenspace development (DCNR coordination).
- Coordinating with municipalities to develop an effective maintenance plan for ongoing maintenance of existing projects.
- Coordinating with municipalities to advocate for and facilitate stormwater retrofit and maintenance programs.
- Collaborating with municipalities to enforce septic maintenance across the region.

VALUES

We are *environmentally conscious leaders*. Our shared value system prioritizes the well being of the planet alongside human needs. We elicit the strength of our value system through a core set of values:

INTEGRITY

Aligning our words and actions we demonstrate honesty, accountability, reliability, transparency, and a strong foundation of ethics.

EXCELLENCE

We consistently strive for improvement, exceed expectations, and take pride in delivering high-quality work.

HUMILITY

We interact with empathy and modesty, acknowledging contributions and learning from each other.

DIPLOMACY

We promote cooperative dialogue, open negotiation, and compromise to foster relationships and expand our impact.

HUMOR

We are adept at bringing levity to difficult situations as a tool to build rapport and release tension.

STRATEGIC GOALS AND PRIORITIES

The leadership team at MAWA has identified six priority areas of focus within five strategic goals. Each goal will be realized by efforts in multiple priority areas. Strategic goals are listed below in bold with their corresponding priority areas of focus.

Administration and Management Systems Development

- HR/Development
- Maintenance

• Watershed Stewardship Program Development

- HR/Development
- Planning and Implementation
- Funding
- Monitoring
- Maintenance

• AMD Remediation Project Implementation

- Planning and Implementation
- Funding
- Maintenance

• Legacy and Succession Planning

- HR/Development
- PR/Coordination
- Funding
- Maintenance

Program Expansion

- PR/Coordination
- Planning and Implementation

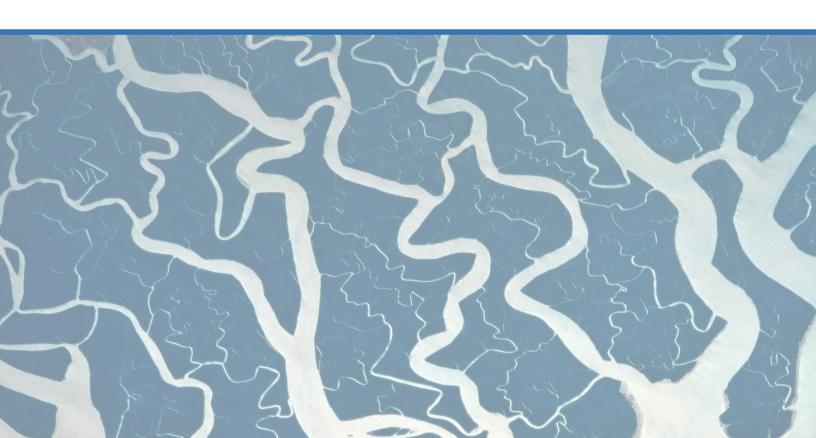

Additional details regarding each of the Strategic Initiatives and Priority Areas of Focus can be found in the following pages and in the MAWA Strategic Action Plan 2025-2030. The accompanying action plan serves as a tool for benchmarking progress and work plan guidance. It is meant to inform annual planning including work plan development, budgeting and funding plan, progress reporting, and adaptive management. The action plan is a 'working document' lending itself to periodic review, updates, and development.

ADMINISTRATIVE AND MANAGEMENT SYSTEMS DEVELOPMENT

Founded in 2022, MAWA is an organization in the early stages of developing administrative controls and processes. Currently, the Sampson Morris Group offers in-kind administrative support to the organization including accounting services, HR support, networking, and office space. With the goal of becoming a self-sustaining organization, MAWA leadership is taking steps to develop internal administrative controls and organizational management processes.

- Developing an organizational Structure/Chart
- Developing an employee manual
- Committing to ongoing website maintenance and a social media presence.

WATERSHED STEWARDSHIP PROGRAM DEVELOPMENT

The Watershed Stewards are the boots on the ground and public facing ambassadors of MAWA. This group of dedicated volunteers complete the EPA Watershed Stewardship Training and commit to monthly in-stream water quality monitoring throughout Murrysville Area watersheds.

- Grant-writing and funding acquisition for water quality monitoring equipment.
- Developing a Watershed Monitoring Plan and Standard Operating Procedures (SOPs).
- Developing a Watershed Stewardship Orientation Training.
- Implementing the Watershed Stewardship Pilot Project including in-stream data collection.

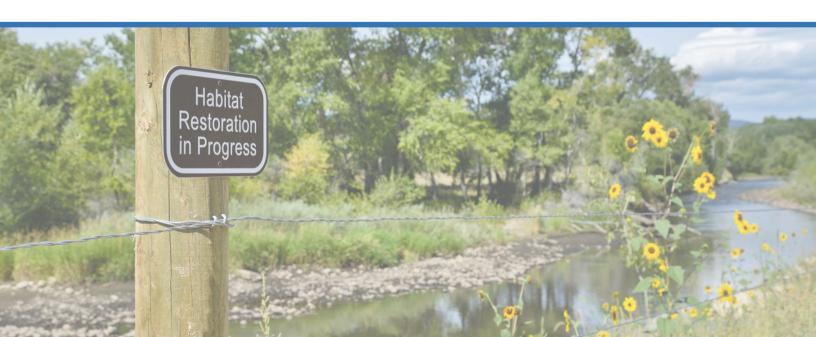

AMD REMEDIATION PROJECT IMPLEMENTATION

MAWA is in the final stages of construction of their first passive AMD remediation project on Lyon's Run. Development of the Lyon's Run project was the catalyst that formed MAWA, expanding the organizations reach and vision. In addition to maintenance of the Lyon's Run AMD Remediation facility, in the near term, the group is beginning to pursue development of the White Valley Active AMD Remediation project.

Completion of these high priority AMD projects along with others in the area aim to improve stream water quality throughout the region, restoring aquatic habitat and providing recreation opportunities for the community.

- Completing the Lyon's Run AMD project landscaping.
- Grant writing and funding acquisition for design and permitting of the White Valley AMD project.
- Data collection and design of the White Valley AMD project.

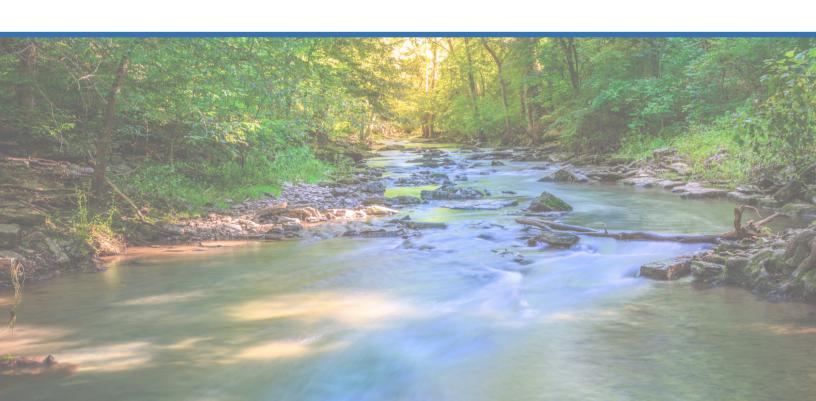

LEGACY AND SUCCESSION PLANNING

As the founding leadership of MAWA looks toward the future, they are considering how the organization will continue to thrive after their tenure has expired. They recognize the need to carry forward the institutional knowledge of the organization through the next generation of MAWA leaders. Through strategic hiring and formal relationship building with private donors, the MAWA leadership is developing a framework of sustained investment in organizational structures, operations, and capital.

- Hiring a Watershed Director.
- Developing a Funding Plan for leveraging private and foundation donations.
- Clarifying and formalizing the relationship between MAWA and the Twyla Sampson Foundation (MOU, Endowment, Annual grantmaking or donation).

PROGRAM EXPANSION

MAWA is a fast growing organization with an opportunity to have a major impact on the water quality, aquatic habitat, and community environmental awareness in the Murrysville Area. They are filling a niche of high-level project development and implementation acumen, direct and engaged leadership, and relationship building; opening new opportunities for program development beyond remediation projects and citizen science.

- Relationship building with advocates of the Irwin Upwelling remediation project.
- Developing Priority Project/Program Pipeline built upon the <u>MAWA Strategic Action Plan 2025-2030</u>.
- Developing conceptual design of the Lyons Run Greenway and connectors.
- Developing a Lyons Run Restoration Plan.

STRATEGIC ACTION PLAN 2025-2030
